#### **Webpage Review**

The logo was modified, a contact number was listed and there are now two calendars.

The calendar is mainly supported by Pam Owen. The Google format is not accessible for all members due to network restrictions.

A list of documents was prepared and they will be posted and expanded upon to include more subject topics.

#### **Virginia Environmental Education Conference**

Stephanie DeNicola and Pam Owen attended the conference. They participated in a variety of concurrent sessions. They both endorsed the conference and felt it would be beneficial to attend again.

#### **Survey Deliverable**

The previously designed survey does not meet the requirements set out in the grant application.

Stephanie DeNicola will develop a different survey.

The group would like the survey to be distributed at the Fauquier Conservation Roundtable meeting. The survey will also be placed online.

The survey is due November 14<sup>th</sup>.

#### **Unmet Deliverables**

The grant calls for participation in stewardship events. Group members will email Deirdre events which they have recently attended that have benefited CRRES.

#### **Next Steps**

It is suggested that CRRES begins focusing on roundtable meetings. Culpeper, Madison and Orange Counties currently do not have roundtable meetings. CRRES could consider existing models and help organize new meetings and provide knowledgeable resources. Issues of marketing and funding are present.

#### **Next Meeting**

November 19<sup>th</sup>, 2008 at the RRRC Conference Room at 10am.
