

Fauquier County Affordable Housing Committee Housing Report 2008

The Fauquier County Affordable Housing Committee is pleased to offer this report on the housing conditions and needs of low and moderate income families and individuals, and residents with special housing needs. The Committee was established by the Board of Supervisors in 2006 in recognition of the lack of and need for affordable housing for citizens and employees of the county.

Rapidly escalating home prices between 2000 and 2006 have made this a critical issue. In 2006 it was reported that 95 percent of the full-time permanent employees of Fauquier County General Government could not afford to purchase a median-priced home in the county, based on their individual income. In 2007, 34.5 percent of County employees lived outside of Fauquier County.

Figure 1 – Source: MRIS, sales of existing homes
Affordable = spending no more than 30% of gross income on housing

One of the tasks assigned to the Committee was to conduct a needs assessment to quantify affordable housing objectives as well as to help define the scope of this issue for the purpose of seeking community and financial support. The assessment examines current housing supply and demand data, and current and projected employment and population figures. Needs of various socioeconomic groups are defined, specifically, the aging and disabled populations, and income groups ranging from median income to extremely-low income.

This report is based on data available from the 2000 U.S. Census, the Virginia Employment Commission, tax assessment records from the Commissioner of the Revenue, and other housing market data and analyses available from commercial and non-profit organizations. The Census Bureau’s 2006 American Community Survey for Fauquier County was released in the fall of 2007 for the first time. Data from that survey are also included in this report.

The remaining sections of this report include:

PROFILE OF TARGETED DEMOGRAPHIC CATEGORIES

The charter from the Board of Supervisors directed the Affordable Housing Committee to look at the needs of five demographic groups: moderate income, low-income, very-low income, extremely-low income, and the elderly/disabled population. The Affordable Housing Committee, after examining data and definitions of affordable housing from various sources, has based the income categories on percentages of median household income reported in the U.S. Census Bureau's 2006 American Community Survey (ACS). The ACS reports Fauquier County's median income to be \$75,000¹. Table 1 in the Appendix provides a summary economic profile of Fauquier County based on U.S. Census data.

Extremely-low income families and individuals

The definition of 'extremely low-income' households includes families with incomes below 30 percent of median. In 2006, in Fauquier County this was a household income below \$22,500 or the income of a single worker earning about \$11 per hour, working 40 hours per week. According to Virginia Employment Commission (VEC) data, examples of local industries with pay in this range include retail trade, arts and recreation, and food service. Of course, a household may include more than one wage earner.

At this income level, affordable housing means a maximum monthly housing expense of \$563. Practically, this segment of the population will rely on subsidized rental housing.

Very Low-income families and individuals

The definition of 'very low-income' households is between 30 percent and 50 percent of median income. In 2006, in Fauquier County this included family incomes between \$22,500 and \$37,500, or hourly rates for one full-time worker between \$11 and \$18. According to VEC, this would include workers in healthcare and social assistance, other services, and some local and state government positions.

With an income of 50 percent of median, the maximum affordable housing expense is \$938, which might purchase a home up to about \$120,000. In 2007, the Metropolitan Regional Information System (MRIS) real estate database reported that one single-family detached home and 12 condominiums in Fauquier County were sold for less than \$150,000. Currently, the private real estate market will not provide for home ownership for residents in this income range. Home ownership programs, such as Habitat for Humanity, or rentals are necessary. Households with incomes under 50 percent of median may qualify for the limited number of income-restricted housing units in the county.

Low-income families and individuals

The definition of 'low-income' is a household earning between 50 percent and 80 percent of median income. In Fauquier County in 2006 this definition includes families earning between \$37,500 and \$60,000. For a single-wage-earner household, this translates to an hourly wage between \$18 and \$29. Starting teacher salaries in Fauquier County fall into this category.

With an income of 80 percent of median, the maximum affordable monthly housing expense is \$1,500, which may possibly purchase a house up to \$200,000. The MRIS data base reports that in 2007 14 single-family detached homes and 41 condominiums in that price range were sold.

Moderate-income families and individuals

The definition of 'moderate-income' is a household earning between 80 percent and 100 percent of median income. In Fauquier County in 2006 this definition includes families earning between \$60,000

¹ The alternative source of median income data is H.U.D. Area Median Income (AMI). An explanation of the reason for choosing to use the ACS figure is included in the section "What Is an Affordable Home?"

and \$75,000, or \$29 to \$36 per hour for a single wage-earner household. According to VEC reports, this includes professional and technical services industries and some federal government positions.

With an income of 100 percent of median, the maximum affordable housing expense is \$1,875, which might purchase a house priced up to about \$250,000.

The following chart shows the income distribution in Fauquier County in 2000 and 2006, according to U.S. Census Bureau sources.

Figure 2 – Sources: ¹2000 U.S. Census, and ²2006 ACS (U.S. Census)

Elderly and Disabled

Housing needs for the elderly and disabled span income levels. This housing generally is characterized by accessibility features. The number of older adults— age 60 and over - in Fauquier County is increasing faster than the rest of the population. While the overall population of the county is projected to increase about 94 percent between the 2000 census and 2030, the 60 and over population is projected to increase by 254 percent from 8,094 to 28,643. The population age 85 and over, which has the greatest need for specialized housing, is projected to increase by 156 percent, from 644 in 2000 to 1,648 in 2030 (Appendix, Table 6.) In 2000, 8.7 percent of the elder population lived in poverty.

In 2006, 791 households received property tax relief under the County’s provision for Elderly and Disabled (Appendix, Table 2.) Of those 791 properties, 154 were classified as substandard condition. Nine properties were listed in the tax database as have no bathrooms.

A Profile of the Aging Population in Fauquier County is provided in Table 3 in the Appendix.

The 2000 census showed that 35.8 percent of the age 65 and over population of the county reported having a disability. In addition, 13 percent of the county’s population aged 21 to 64 reported having a disability.

WHAT IS AN AFFORDABLE HOME?

Before examining the current inventory and supply of affordable housing in the county, it is important to define the term ‘affordable housing.’ The U.S. Department of Housing and Urban Development (HUD) definition of affordability – that a household pay no more than 30 percent of its annual income on housing – leaves a broad range of possibilities when it comes to identifying the supply

or inventory of affordable homes in Fauquier County. The following chart summarizes the maximum housing expenditure and possible price range of affordable homes for households at various income levels.

FAUQUIER COUNTY HOME AFFORDABILITY				
Household Income ¹	Approximate Income Category	Monthly Housing Expense ²	Affordable Home Price Examples ³	
			Scenario A	Scenario B
\$ 75,000	Moderate (80% - 100%) Median)	\$ 1, 875	\$ 198,000	\$ 256,000
\$ 60,000		\$ 1,500	\$ 158,000	\$ 204,000
\$ 50,000	Low (50 – 80%)	\$ 1,250	\$ 130,000	\$ 169,000
\$ 45,000		\$ 1,125	\$ 116,000	\$ 151,000
\$ 35,000	Very Low (30 – 50%)	\$ 875	\$ 89,000	\$ 115,000
\$ 30,000		\$ 750	\$ 75,000	\$ 97,000
\$ 22,500	Extremely Low (30% and below)	\$ 563	\$ 48,000	\$ 70,000

Figure 3

¹ Income Source: This report uses 2006 American Community Survey (ACS) estimate of median income rather than HUD Area Median Income (AMI). Because Fauquier County is part of the DC-VA-MD HUD Metro Area, HUD AMI figures are based on the entire Metro Area, not just Fauquier County. The Census Bureau’s 2006 ACS reports Fauquier County’s 2006 median income as about \$75,000, compared with the 2006 HUD figure of \$90,300. HUD 2008 AMI is \$99,000.

² For rentals, the monthly housing expense includes rent and utilities. For home ownership, the expense includes mortgage payment, utilities, taxes, and HOA or condo fees.

³ Affordable home price source: RealtyTrac – approximately 30% of gross income for housing.
Assumptions: Scenario A – Other debt = \$200; interest rate = 7%; down payment = 5%
Scenario B – Other debt = \$0; interest rate = 5.5%; down payment = 15%

The actual affordable home purchase price may vary considerably among families with the same income. The amount of the down payment and the available interest rate can make a significant difference in what a family can afford. Other debt, such as a car payment, also plays a role in the calculation. As an example, consider a family at 80 percent of median income, with an income of \$60,000. With a 5 percent down payment, interest rates of 7.0 percent, and \$200 in other monthly payments, an affordable house for them might be around \$150,000. With a 20 percent down payment and an interest rate of 5.5 percent, no other monthly long-term debt payments, all other assumptions the same, a home priced at \$204,000 might be affordable.

Although HUD and other housing advocacy sources use the benchmark of 30 percent of gross income to define affordable housing expenses, conventional lenders frequently have guidelines that allow mortgages with payments from 32 to 38 percent of gross monthly income.

“Affordable Housing” also assumes that the housing is safe, adequate and in a suitable location. A two-bedroom apartment is not appropriate affordable housing for a family of six, even if the rent falls within the maximum housing expense limit.

CURRENT HOUSING SUPPLY AND INVENTORY

For purposes of this assessment, the term ‘housing supply’ is used to refer to the rental and sale housing units currently available. The term ‘inventory’ refers to total housing units - occupied and unoccupied, rented and owner-occupied - that exist in the county.

Inventory of Detached Single Family Properties

The Commissioner of Revenue’s property tax database offers a snapshot of properties, and their assessed values and conditions at the time of the last assessment plus new development. After adjusting to remove multiple dwelling units on the same parcel, the following chart and table provide a summary of the data.

Housing Inventory from Tax Assessment Records 2007

	TOTAL		CEDAR RUN		CENTER		LEE		MARSHALL		SCOTT	
	Number	%	Number	%	Number	%	Number	%	Number	%	Number	%

Figure 4
Source: 2007 Property Tax Database

Distribution of Properties under \$250,000

Substandard Housing

Of the 21,232 properties listed in the table of Figure 4, 3,010 (14 percent) are assessed below \$250,000, which is in the upper price range affordable to families earning at or below median income. Of those properties, 655 or 22 percent are reported in fair or poor condition. The 2006 ACS reported that 686 households heat with wood and 78 are estimated to have no heating source. Also, 116 housing units lack complete plumbing facilities and 83 lack complete kitchen facilities. A Complete 2000/2006 Housing Profile comparison is provided in Table 4 in the Appendix.

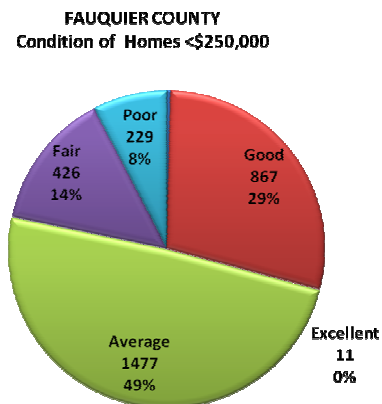

Figure 5
Source: 2007 Property Tax Database

Supply of Homes for Purchase

Between 2000 and 2006, the median sales price of existing homes in Fauquier County increased from \$176,000 to \$420,000. In 2007 the median price was about \$375,000. Despite this market correction, the median price in 2007 is still 113 percent higher than in 2000, putting home ownership out of reach for many potential first-time buyers.

Home Ownership Opportunities in Fauquier County

Household Income	No. of Households ¹	%	Estimated Price Range for Affordable Homes	No. of Existing Homes ²	%	Current Real Estate Listings ³	%
under \$35,000	3,559	17.1%	Under \$105,000	68	0.3%	2	0.0%
\$35,000-\$50,000	2,603	12.5%	\$105,000 - \$150,000	215	1.0%	15	2.1%
\$50,000-\$75,000	4,264	20.5%	\$150,000 - \$250,000	2,727	12.8%	111	15.2%

Figure 6 ¹ 2006 American Community Survey, U.S. Census; includes households in multi-family rental and ownership units
² Property Tax Database 2007 – Does not include multi-family units
³ MRIS February 2008 – Includes condominiums and coops

Rental Housing²

For many families, rental housing is the best option and also can be a first step toward home ownership. The assessment showed there is a shortage of multifamily rental housing in all price ranges. One of the greatest needs, however, appears to be for well-built, well-designed two- and three-bedroom apartments in the \$600 to \$1,000 per month price range to meet the needs of households with incomes under \$50,000. Households in this income range generally are not candidates for home ownership. These families and individuals comprise nearly 30 percent of the County's population.

Some of these households will qualify for subsidized or income-restricted housing, but the supply of this type of rental housing is limited. There are 151 existing LIHTC units in Warrenton and 146 units in Bealeton. In addition there are 209 units for the elderly in Warrenton (Appendix, Table 5.)

The Housing Choice Voucher Program serves 137 Fauquier County households with incomes below 50 percent of HUD's Area Median Income (AMI). The elderly, disabled and homeless receive priority for this program in which an individual or family pays 30 percent of their income toward their housing expense and the voucher program pays the balance, up to the HUD-defined limit. The last time a new voucher was issued was in 2006 and the waiting list has been closed since 2002. There is no expectation that new vouchers will be available in the foreseeable future.

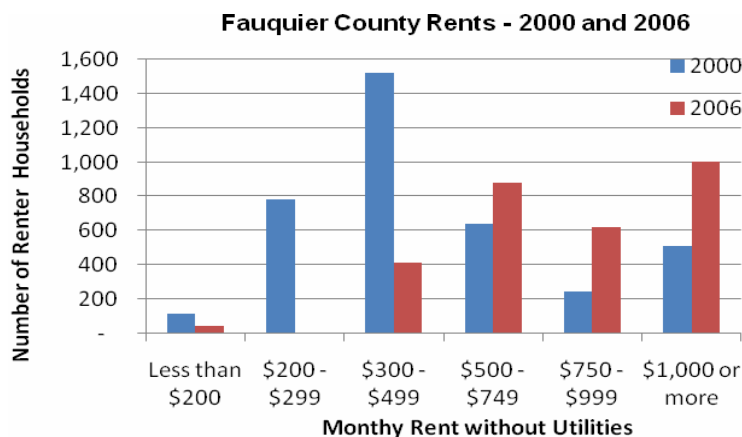

Figure 7- Sources: 2000 U.S. Census and 2006 ACS

While the median income increased by 21 percent between 2000 and 2006, the median rent payment in Fauquier County increased by 38 percent, from \$594 to \$821. During that time, the number of rented units decreased while the percentage of owner-occupied residences increased from 76 percent to 81 percent.

² There is no readily accessible data to produce a complete inventory of rental housing in the County. This assessment relies on information from the 2006 ACS, interviews with individuals in the housing and real estate industries, and housing advocates. Information on Low Income Housing Tax Credit (LIHTC) properties was obtained from VHDA's *Existing Tax Credit Developments*.

SERVICES FOR THE HOMELESS POPULATION

EMERGENCY SHELTER

Fauquier Family Shelter Services (FFSS) operates the only emergency shelter in the County. FFSS opened its first emergency shelter in 1988. The Haven Emergency Shelter, which has a total of 52 beds, was opened in 1999 and immediately began operating at capacity.

In 2007, 335 persons were sheltered at the Haven. Of that number, 97 were single adults, 20 were married couples without children, and 76 were adults with children. One hundred forty-two (142) children received shelter during the year.

During 2007, 264 requests for emergency shelter were denied for various reasons. Twenty-one of the requests were denied because The Haven was full.

TRANSITIONAL HOUSING

Transitional housing programs facilitate the movement of homeless households to permanent housing by providing services along with temporary housing.

FFSS opened its first transitional house in 1994. The Vint Hill Transitional Housing (VHTH) program opened in 2001. VHTH has 16 townhomes for transitional clients, each with three bedrooms and one and one-half baths. In 2007, VHTH sheltered 15 families, including 51 children and 40 adults.

Community Touch, Inc. operates Victory Transitional Housing (VTH), which opened in 2003. VTH has the capacity to shelter 40 homeless individuals. In 2007, 79 individuals were served, including 39 adults and 40 children. During the year, 159 requests for shelter were denied.

PERMANENT HOUSING - CONSTRUCTION AND REHABILITATION

Fauquier Habitat for Humanity works in partnership with community churches, businesses, volunteers and families to eliminate the blight of poverty housing: leaky roofs, lack of indoor plumbing, kitchen or bath facilities, no source of heat, and other unsafe or unsanitary conditions. Since 1991, Habitat has built 37 homes, rehabilitated several others and is undertaking a new project to construct a 7 duplex subdivision at Sterling Court, just off Academy Hill Drive in Warrenton.

Fauquier Housing Corporation (FHC), which has been in operation for 36 years, is a nonprofit housing developer whose mission is to provide affordable, safe and decent housing opportunities to households in the Fauquier Housing Corporation service area.

FUTURE NEED

Future housing demand and prices will be influenced by population and job growth locally and regionally. Northern Virginia growth and housing prices will continue to have an impact on housing demand and price in Fauquier County. Despite the current slowdown in the housing market, the long-term forecast for the region predicts economic and employment growth, and an upturn in the housing market.

The Fauquier County Board of Supervisor’s has established a target annual growth rate of 1.5 percent. Since 2000, the actual rate has been around 2.8 percent. Population projections published by the Virginia Employment Commission (VEC) show a 94 percent increase in the County’s total population between 2000 and 2030. The number of older adults age 60 and over is projected to increase at a faster pace – 254 percent – in the same time period. (Appendix, Table 6)

Figure 8 – Source: Virginia Employment Commission

While VEC does not have employment projection figures specific to Fauquier County, it projects a 20 percent increase in employment between 2004 and 2014 in Local Workforce Investment Area VI (Planning Districts 9 and 10.) The largest number of new openings are expected to be in occupation groups ‘Education, Training and Library’, ‘Healthcare Practitioners and Technical Occupations’, ‘Food Preparation and Serving Related’, ‘Sales’, and ‘Office and Administrative Support.’

Northern Virginia is projected to see job growth averaging over 26,000 new openings annually in the same time period of 2004 to 2014.

There were 255 new building permits issued in 2007, about half the number in 2006 and a significant decrease from 2004 and 2005 (Appendix, Table 7.) There have been no building permits for multi-family structures issued since 2006.

Quantified Need for New Affordable Housing Units to Meet Projected Population Growth

In order to maintain a level supply of affordable homes for moderate and low-income families - assuming that population growth meets the target annual rate of 1.5 percent, and that housing prices remain level - the following number of new units will be needed annually in addition to replacing any substandard properties that are no longer habitable:

Income Category	New Unit Annual Need	Primary Type(s) of Units
Moderate Income	64	✓ Ownership units - detached or attached (condos/town homes) with \$150,000 to \$250,000 sales prices
Low Income	39	✓ Multifamily rental units with monthly rents \$800-\$1,000 ✓ Attached ownership units with sales prices under \$150,000
Very-low Income	15	✓ Multifamily rental units with monthly rents \$500-\$800 ✓ Habitat homes
Extremely-low income	39	✓ Multifamily rental units with monthly rents under \$500

In each of these income categories, there is a need for a variety of one-, two-, and three-bedroom units.

Methodology

These numbers represent an estimate of the annual number of new households in each of the income categories, assuming an annual population growth rate of 1.5%, with the goal of maintaining the current income distribution among Fauquier County households. The growth rate of 1.5% was used in the above calculations because it is the current official projection of the Board of Supervisors as presented in the Comprehensive Plan. This methodology also assumes that the average household size will remain relatively stable. It does not address any current shortages of affordable homes.

The table below illustrates Fauquier County's current income distribution, based on the 2006 ACS, and the calculations used to arrive at these numbers. The chart also shows, for comparison purposes, how these figures would increase if different population growth projections were applied.

These projections should be reviewed annually, and revised as necessary, based on new data.

Number of New Housing Units Needed Annually to Meet Needs of New Population, at Various Growth Rates

Approximate Income Category	Household Income	No. of Household Units ¹	% of Total Pop.	Approximate Price Range for Affordable Homes ²	Monthly Housing Expense ³	Annual Increase in units @ 1.5% growth ⁴	Annual Increase in units @ 2.0% growth ⁴	Annual Increase in units @ 2.5% growth ⁴
Extremely low	Under \$25,000	2,568	12.4%	Under \$80,000	Under \$625	39	52	64
Very Low	\$25,000-\$35,000	991	4.8%	\$80,000 - \$115,000	\$625 - \$875	15	20	25

² Some figures are rounded. Most figures calculated using RealtyTrac Affordability Calculator, based on 5.5% interest rate and 15% down payment

³ Equal to 30% of monthly income. For rentals, monthly housing expense includes rent and utilities. For owned homes, monthly housing expense includes mortgage payment, utilities, taxes and insurance.

⁴ Number of household units, from ACS, multiplied by specified growth rate

CONCLUSIONS AND RECOMMENDATIONS

1. The growth in population and housing in Fauquier County in the past seven years has consisted largely of households with incomes above the county median. This has generated the rise in the area median income and has contributed to the escalation in housing prices. This trend is likely to continue, unless policy and planning changes are implemented to promote a variety of housing types and costs.
Recommendations: Update the Affordable Housing section of the Comprehensive Plan to reflect the goal of diversity of housing type, price and density. This section should define affordable housing and set targets for maintaining the inventory of affordable homes at ratios no lower than 2006 levels.
2. If Fauquier County wishes to maintain the current level of affordable housing, assistance will be needed to complete repairs and rehabilitation on some substandard dwellings. Some of these properties, which cannot be brought up to livable standards at a reasonable cost, will need to be replaced.
Recommendations: Continue to support county nonprofit organizations that operate home repair and rehabilitation. Explore ways to offer incentives to homeowners to encourage needed repairs and rehabilitation. Consider establishing an outreach program to identify elderly, residents with disabilities, and other low-income families who are living in substandard housing and need assistance with repairs, rehabilitation, and home modifications.
3. One of the greatest identified needs is for well-designed and well-built low- and moderately-priced multifamily housing, for rent and ownership. This type of housing is best suited for areas with public utilities, tying affordable housing needs to County land use planning, and creating unique challenges for the towns within the County.
Recommendations: Work with the towns of Warrenton, Remington and The Plains to look at the current and planned affordable housing efforts and identify opportunities for joint action. Review county service district plans to ensure that affordability concerns are addressed.
4. Accessibility issues in housing for older adults and persons with disabilities span income brackets but can be more difficult to overcome for low- and moderate-income households. All new housing plans, particularly those designated as 'age-restricted' can benefit from a review for accessibility.
Recommendation: Promote and encourage concepts of universal design and 'visitability' in building projects throughout the community.
5. The needs of the homeless and extremely low-income families and individuals are best met by a combination of housing and services. Existing local emergency and transitional programs are unable to fill all of the current requests for shelter and services.
Recommendations: Continue to work with local nonprofit housing organizations and the Regional Continuum of Care to monitor the needs of the homeless, provide adequate shelter and services, and develop solutions for chronic homelessness.
6. A local Affordable Housing Trust Fund can be an important tool to address many of the identified affordable housing needs.
Recommendations: Identify potential sources of funding for a local housing trust fund. Evaluate the effectiveness of the SPARC New Homeowners Program and make a recommendation about continuing the program.

EMERGING ISSUE: FORECLOSURES

The national subprime mortgage crisis has had an impact on the housing situation in Fauquier County. All of the local housing nonprofits report a significant increase in the number of calls from individuals and families looking for assistance because of eviction or difficulty paying their mortgages. At the end of April 2008, the RealtyTrac website listed 230 Fauquier County properties in foreclosure or bank owned. This is a situation that merits continued monitoring.

Source: U.S. Census Bureau, Census 2000 Summary File 3, American Community Survey 2006

¹Income of Households – This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

²Income of Families – In compiling statistics on family income, the incomes of all members 15 years old and over related to the householder are summed and treated as a single amount.

³Householder – The data on relationship to householder were derived from answers to Question 3, which was asked of all people in housing units. One person in each household is designated as the householder. In most cases, this is the person, or one of the people, in whose name the home is owned, being bought, or rented and who is listed on line one of the survey questionnaire. If there is no such person in the household, any adult household member 15 years old and over could be designated as the householder.

APPENDIX

TABLE 2

TABLE 3 - HOUSING PROFILE OF OLDER ADULTS IN FAUQUIER COUNTY

- In 2006, there were 3,280 residents aged 75 and over
- In 2000, there were 1,104 owner-occupied households headed by a resident aged 75 or older
 - Of those 1,104 households, 289 had household income under \$20,000
 - Of those 289 households, 199 (18% of 1,104) were identified “with conditions”*
- In 2000, there were 335 renter households headed by a resident aged 75 or over
 - Of those 335 households, 198 had household income under \$20,000
 - Of those 198 households, 140 (42% of 335) were identified “with conditions”*
- In 2000, total number of households headed by resident aged 75 or over was 1,439
 - 487 of these households had income under \$20,000
 - Of those 487 households, 339 (24% of 1,439) were identified “with conditions”*
- In 2006, the number of residents aged 75 and over was estimated to be 3,145 (an increase of 25% over 2000)
- In 2010, the number of residents aged 75 and over is projected to be 3,559 (an increase of 42% over 2000)
- In 2020, the number of residents aged 75 and over is projected to be 5,626 (an increase of 124% over 2000)
- In 2030, the number of residents aged 75 and over is projected to be 9,037 (an increase of 260% over 2000)
- In Virginia in 2000, almost half of all renter-households, with a head aged 75 or over paid 35% or more of their income for housing, a proportion higher than for any other age group. The proportion for owner-occupied households is 15%.

**“With conditions” is defined by H.U.D. as a household having at least one of the following housing conditions: lacking complete plumbing facilities, lacking complete kitchen facilities, with more than 1.01 persons per room, and selected monthly owner costs greater than 30 percent of household income (1999) or gross rent as a percentage of household income (1999) of greater than 30 percent.
