Coordinated Public Transit - Human Services Transportation Plan

- Coordinate services of VRTA, Volunteer networks, public and private providers to meet all special transportation needs
- Establish central dispatch function for volunteer network
- Expand volunteer transportation beyond medical and emergency service
- Accommodate those who can pay as well as those who cannot
- Incorporate GIS mapping
- Make Alternative Transportation socially acceptable

25% to 30% of residents don't have a car or can't drive

How do we address the transportation needs of this population ?
